

Light Medicine Guide

Light Medicine Series teaches you to tap into the elements of the Universe and harness them to create wellbeing for you and your body. Initially introduced as a self healing system, it has expanded into a distant healing modality using various Light Key Frequencies, Vortices and many more elements. It means you can get certified and use these protocols for your clients as well.

The Light Medicine Series has following levels

The prerequisite for your Light Medicine learning journey is the Vortex of Light Attunement.
